

Lubrication and maintenance 65ml

An advanced lubricant and preservative that retains its properties in all weather conditions. Colourless, odourless, forms a thin and extremely durable film on the metal surface. Applied to the barrel tube, it evaporates completely after the shot is fired. The antistatic properties of the substance prevent the surface from being covered with any particles, which minimizes the risk of jamming. Protects against corrosion and extends service life.

SPECS

- ✓ Oil
- ✓ Odourless
- ✓ Protects against corrosion
- ✓ Evaporates

DIRECTIONS FOR USE:

Clean the gun with Cleaning Foam.

Apply Oil & Grease.

Wait for it to dry.

Remove excess substance with a clean cloth.
