

LV-01 is a compact and reliable bubble level designed for mounting on a Picatinny rail, ensuring precise control of rifle tilt during long-range shooting.

SPECS

- ✓ Picatinny
- ✓ Material : 7075-T6 ALUMINIUM
- ✓ Coating : Hard anodizing

Information about the Product

Developed in response to a request from Ukrainian snipers, the LV-01 initially was specifically engineered for use with the Barrett MRAD rifle. The requirement was for a create bubble level that could mount directly to the Picatinny rail and under the objective lens of a scope.

Engineered with a low-profile design, the LV-01 has no protruding parts that make it unnoticeable and extremely practical for shooters working in the most difficult environments.

With its robust construction, streamlined form, and military-grade design, the LV-01 is an essential accessory for achieving unparalleled accuracy in any shooting scenarios.
